CUSTOCENTRIX
YOUR RETAIL ACCELERATOR

Frame

Designed to be held in a VESA mount that can be easily placed on a counter without taking up too much room, the principle behind the Frame is the same as for the Kiosk with a card reader on the front as well as an NFC reader and a 13-inch touchscreen.

THE NEW LINUX VERSION BRINGS THE FOLLOWING ADVANTAGES:

- A **major overhaul of the touchscreen device** to provide better results;
- **A new version of the 'CustoCentrix Application Store' app** has a response time which is more than three times faster than your current apps:
- **The kiosk login and password have been replaced** by a provisioning and remote control system;
- This makes it **possible to monitor remotely**;
- And **much more!**

All our kiosks come with an ID card reader.

The NFC reader is optional.

The barcode reader is not available in the Frame
