

Kiosk

Kiosk is a new, full version of the classic kiosk, with a 13-inch touchscreen and 1920x1080 resolution.

The new design makes it easier to insert the card into the front of the device and makes it more visible for the customer. It also has an NFC and Barcode reader (optional) to respond to new uses with apps (e.g. smartphone).

THE NEW LINUX VERSION BRINGS THE FOLLOWING ADVANTAGES:

- A **major overhaul of the touchscreen device** to provide better results;
- A **new version of the 'CustoCentrix Application Store' app** has a response time which is more than three times faster than your current apps;
- **The kiosk login and password have been replaced** by a provisioning and remote control system;
- This makes it **possible to monitor remotely**;
- And **much more!**

*All our kiosks come with an ID card reader.
The NFC reader and the Barcode reader are optional.*
